

# Fife College

## Using technology in your learning

### Read&Write

read&write software is installed on all PCs and laptops in the College. This software can help make reading, writing, research and studying easier. From reading on-screen text aloud to researching and help proofreading coursework, read&write can help everyone in their learning. If spelling is a concern, word banks can be created to help you with new words and a mind mapping facility can help planning work or revision.

### Microsoft Word

Learn how to use the inbuilt features in Word, eg referencing and changing the background colour.

### Apps

Discover which apps could be useful for you so you can 'learn-on-the-go'!

### Mobile Technology

Get advice on how your mobile or tablet can work harder for you as you study.

### Support for Learning

Drop by our Support for Learning Centres for advice or to book a 1:1 training session.
